

Assistive Technology and Independence

Presented by: Gary Johnson, ATP
Iowa Program for Assistive
Technology

Technology has finally caught up with
you!!!!!!!

iPhone

iPad

Jessica and her iPad

- Jessica is a young lady with Cerebral Palsy.
- She loves the iPad because it replaced numerous pieces of equipment.
- It is easy to transport and is the same equipment her friends use-she just uses it differently.
- She can research and select apps that work best for her!
- SIRI can be made to operate “Hands Free”

Make a phone call with SIRI

- Hold down the “Home” key.
- You will get a beep and SIRI will ask “What can I help you with?”
- You respond “Call
- SIRI will respond with “Calling
- SIRI will ask when there are multiple #'s.

Voice text with SIRI

- Hold down the “Home” key
- You will get a beep and SIRI will ask “what can I help you with?”
- You will say “Text
- SIRI will respond “What would you like it to say?”
- You will verbalize your text.
- SIRI will print your text and ask if you are ready to send it.
- You verbally respond “send” or “cancel”

Facebook post with SIRI

- Hold down the “Home” key
- You will get a beep and SIRI will ask “What can I help you with?”
- You will say “Facebook post”
- SIRI will ask “What would you like to say?”
- You will verbalize your post.
- SIRI will print and tell you she updated your Facebook status.
- You verbally respond “send” or “cancel”

Facetime with SIRI

- Hold down the “Home” key.
- You will get a beep and SIRI will ask “What can I help you with?”
- You will say “Facetime.....”
- SIRI will say “ Making a Facetime call to.....”

What else can SIRI help with?

- Directions to addresses
- Information searches
- Trivia
- Game answers
- ?
- ?
- ?

Speech Recognition

- iPhone 4s and newer
- iPad 3 and newer(iPad 2 can download a Speech Recognition program called Dragon but it uses a different access format)
- Look for a microphone to the left of the Space bar
- No voice file needed!!!!!!!!!! Try it!!!!
